Santa Cruz LAFCO
Resolution No. 730
Sphere of Influence Determinations
The Vineyard County Service Area

The following determinations are made pursuant to Government Code Section 56425.

- (1) The present and planned land uses in the area, including agricultural and open space lands.

DETERMINATION: The Vineyard area is a substantially-developed rural subdivision. The County General Plan designates the proposed service area for rural residential uses. In the vicinity, Assessor's Parcel Number 63-172-08 is covered by an open-space easement and agricultural (A) zoning.

- (2) The present and probable need for public facilities and services in the area.

DETERMINATION: The present service needs for the Vineyard area are those of a rural subdivision: principally road maintenance, police protection, and fire protection. Road maintenance is currently provided by a road association. This proposal would transfer road maintenance to a County Service Area. Police and fire protection services would not be affected. Future service needs will be substantially the same as the current needs.

- (3) The present capacity of public facilities and adequacy of public services which the agency provides or is authorized to provide.

DETERMINATION: The proposed County Service Area would be a agency limited to road maintenance and operation. Similar County Service Areas in other locations in the county have provided adequate road maintenance services based upon the level of services which the affected citizens want and are willing to pay for.

- (4) The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.

DETERMINATION: The relevant community of interest is the area accessed by Junco, Quail, and Towhee Drives. The proposal logically excludes adjacent residential parcels which have access directly from Pine Flat Road--a county-maintained road.
