RE: Public Comment on Agenda Item 6.a.
Support of Recommended Actions

Dear Local Agency Formation Commission Chair, Board, and Executive Officer

I am a water customer and property owner in the Big Basin Water Company, Inc. water service area, and I am providing a public comment in support of the Recommended Actions for Agenda Item 6.a. I thank Executive Officer Mr. Serrano for preparing the Governance Options Report. I read the report and I found it both helpful and informative.

Please approve the draft report and direct Mr. Joe Serrano to work with Moonshot Missions to further explore all possible governance options and further refinement of the steps, procedures, and potential financing available. I applaud the efforts and good work produced in this draft report and more detail and procedural information will be of great help to myself and the rest of the Big Basin Water Customers.

It is apparent from the draft report that significant public support is necessary for most of the governance options listed in the draft report. I encourage Mr. Serrano and the Board to continue communication and transparency with members of the affected public.

Thank you again to the Board and all the efforts in assisting our situation.

Sincerely,

Patrick LaBruzzo, PE
